SikaColor®-120 G

GRANULAR INTEGRAL COLORS

SikaColor®-120 G Granular Integral Concrete Colorant is free-flowing concentrated pigment granules designed to permanently color concrete and other cementitious materials. It can be poured directly into concrete mixes, conveyed by gravity feed or pneumatic equipment, or pre-dispensed into repulpable bags.

C27 Westwood Brown

C2136 Durango Brown

C30 Brownstone

C359 Barcelona Brown

C26 Antique Cork

C3150 Bark

C14 French Gray

Colors shown on this chart approximate the color of broom finished concrete flatwork made with a medium gray cement and cured with SikaColor®-500 Colorwax™ in the matching color or sealed with solvent-based SikaCem®-100 Clear Guard®. If SikaColor®-500 Colorwax™ or SikaCem®-100 Clear Guard® are not used, the concrete color will not be as vibrant as shown.

Concrete should be batched and placed in accordance with Product Data Sheets.

Concrete color is altered by many factors, including cement and aggregate color, slump, finishing practices, and curing method. Using the contemplated materials and construction techniques, representative samples should be cast for approval, especially when exact color matching is important.

C3650 Navajo Red

C3760 Roman Tile

C3250 Chicory Spice

C3450 Musky Mulberry

C2836 Smokey Plum

C3245 Golden Maize

C20 Limestone

C12 Mesa Beige

C17 Earth Stone

SikaColor®-120 G Granular Integral Concrete Colorant adds color that is weather resistant, UV stable, lightfast, and alkali resistant. It contains no materials that initiate, accelerate, or promote the corrosion of steel, coated metal, plastic, or rubber concrete reinforcements. SikaColor®-120 G Granular Integral Concrete Colorant will not migrate from standing water, and can safely color concrete fountains, pools, water features, or concrete that will be polished and encounter damp or wet environments. All pigments used conform to ASTM Standard C979 (Standard Specification for Pigments for Integrally Colored Concrete).

SikaColor®-120 G

GRANULAR INTEGRAL COLORS - ADDITIONAL INFORMATION

Add beauty to both vertical and horizontal projects with SikaColor®-120 G Granular Integral Concrete Colorant. These reliable, nonfading and consistent admixtures for cast-in-place and precast concrete have been proven to stand the test of time.

SikaColor®-120 G Granular Integral Concrete Colorant is available through select ready-mix producers and distributors with the SikaColor® Granular Dispensing System. The simple, accurate and low maintenance solution to concrete color on demand.

Beauty, Durability and Value

SikaColor®-120 G Granular Integral Concrete Colorant provides streak-free color-conditioning and performance characteristics superior to concrete colored with raw pigments. Over 700 tested color formulas are available for immediate packaging with the SikaColor® Granular Dispensing System.

Sika provides free consultation and specification assistance to design and construction professionals to help achieve the required combination of high-performance characteristics.

WE ARE SIKA

Sika is a specialty chemicals company with a leading position in the development and production of systems and products for bonding, sealing, damping, reinforcing and protecting in the building sector and the motor vehicle industry. Sika's product lines feature concrete admixtures, mortars, sealants and adhesives, structural strengthening systems, industrial flooring as well as roofing and waterproofing systems.

Our most current General Sales Conditions shall apply.

Please consult the Product Data Sheets prior to any use and processing.
